## In the Abstract

Please make the following amendments to the **Abstract** on the last page of the application as shown below. It is respectfully requested that this Abstract be entered.

The armchair comprises a seat (1) where the an armchair user is seated and at least one armrest (3) that can be folded between a substantially horizontal position and a substantially vertical position, that is characterised characterized in that said the at least one armrest (3) describes a downward trajectory when moved from the substantially horizontal position to the substantially vertical position. Therefore, the The armrest does not bother the armchair user when it is in its substantially vertical position, thus enabling manufacturers to exploit the maximum width allowed for this type of armchairs.
